CONCEPTS OF RULES

Tenant - a person who rents property from the Lessor and has entered into an agreement with him for the protection of the risk of damage for the benefit of himself or others.

The lessor is UAB " Bokštelis.lt ".

The interest in the protection of the risk of damage is the interest of the Lessee in not suffering losses due to the occurrence of a compensable event.

The object of damage risk protection is property interests related to the property leased by the Lessor to the Tenant.

The risk of damage is the probability of an event, the occurrence of which is possible in the future and which does not depend on the Tenant's will.

The parties to the agreement are the Tenant and the Landlord.

Damage risk protection agreement - an agreement between the Lessor and the Lessee, according to which the Lessee undertakes to pay an agreed-upon amount of payment within the specified terms, to fulfill other obligations established in the agreement and the rules, and the Lessor undertakes to apply damage risk protection to the leased property, specified in the agreement, upon the occurrence of a compensable event, in accordance with these provisions of the rules.

The deduction is defined as a specific amount of money and/or as a percentage of the loss, unless otherwise specified. If several types of deductions for the same risk are established in the agreements, one, larger one of them is always applied. A non-compensable event is a case where damage risk protection does not apply and the Lessee must compensate the Lessor for the damage he has suffered.

Persons related to the Tenant, who are also obliged to fulfill the duties set for the Tenant: a) persons who live together with the Tenant; b) persons who are responsible for the damage risk protection object according to the agreement with the Lessee; c) persons related to the Tenant
